An NHGRI-funded study conducted by Duke University

Organizational Readiness to Change Survey

Thank you for taking the time to complete this brief and confidential survey on your organization's culture for change. Please answer freely and click the response that best reflects your clinic's readiness to implement the MeTree risk assessment program.

MeTree is a health IT tool that collects family history directly from patients and provides clinical decision support and risk assessment reports to patients and providers. Through this survey, we hope to identify your clinic's ability to readily adopt changes that might positively or negatively affect use of this tool.
